# CALIFORNIA NOMAD

## UGG®

# Seasonal overview

---

This Spring-Summer, our California Nomad theme celebrates our laidback, California fashion aesthetic with styles that embrace the spirit of self-expression and a carefree lifestyle, inspired by the global popularity of #vanlife, music festival culture, and the work-from-anywhere scene.

Our Women's line brings a fresh and modern take on focus areas like sneakers, sandals, and transitional hybrid styles for Spring-Summer. Our entire collection explores new beginnings with innovative, versatile, and Heritage-infused products for strong, recognizable design statements.

In Men's it's our strongest warm-weather lineup yet. We'll maximize our franchises with premium leathers and bold Heritage detailing to stand out in the marketplace. Our new materials, including fresh crochet engineered mesh and micro mesh, offer a breezy warm weather look and feel.

For Kids' we prioritize Mini-Me moments as matching with a parent is a fun bonding experience for little ones. Kids love a good story, and our Stuffies line of sandals and booties bring a fun distraction in a busy world. Watch out for our Zuma update, and our expanding Kolding franchise for toddlers.

We create comfortable products and experiences that enable self-expression for all, while targeting active, multi-dimensional consumers who are naturally influential and can style UGG Footwear on any occasion.

# Shoes and Sneakers

---

This SS24, we'll see the introduction of co-gender hybrid styles, like the Venture Daze that embodies an adventuring spirit and comes in both a mule and slide silhouette. Our everyday essentials bring the Tasman IOE with its transitional style and breathable lining for year-round styling. The popular Cali Wave gets a seasonal update through its spring materialization refresh. The Tasman Sport returns with colorway updates to sit along our core carryovers all available for the initial intro date. Innovation is key for this category and rethinking silhouettes for men, like mules and slip-ons, are our next big design outlook.

Our priority all-gender sneaker of the season is the Goldencush with its Heritage inspired design and a fashion twist. Heritage comes through our CA78 collection, while athletic leisure is key for the 805 with its spring-forward color and material updates, and our ever-essential South Bay sneaker gets a fresh wash of Heritage-inspired material.

## Men's Slippers

---

Men's Slippers has newness in material updates for the season. We'll manage our most popular styles for men, like The Tasman, by reducing SKUS to maintain heat in this category, and we'll offer a seasonal material-up to keep the consumer following their favorite slipper. We predict our Classic Slip-On will be an emerging Icon in the category and we look to a material update to keep momentum pressed for this style. The indoor Scuff will get a new injection of energy with a seasonal fabrication that is rooted in our Heritage DNA.

# The Tasman Flecked Knit Slipper

## **Season On Point**

The Tasman is now perfect for warmer weather with knit material that is breathable and lightweight.

## **Indoors Or Out**

Pavement-ready style lets you bring the feeling of UGG outside.

## **Responsible Materials**

Sugarcane EVA outsole material is made from fast-growing, renewable sugarcane.

## Materials

<b>Twinface Sheepskin</b>	Vetted through extensive, industry-leading processes to ensure only the highest quality sheepskin makes the cut, delivering the signature feeling of UGG.
<b>UGGPURE™</b>	Delivers the luxurious feel UGG is known for with upcycled wool woven into a durable, recycled backing.
<b>UGGPLUSH™</b>	Maintaining the same benefits, UGGplush™ blends our signature wool with plant-based lyocell fibers for softness and sustainability.
	LWG is a multi-stakeholder group that develops and maintains protocols to assess the environment compliance and performance capabilities of leather manufacturers.
<b>HYPERWEAVE</b>	Blends soft cotton and springy nylon into a knit layer that delivers weightless flexibility and enhances ventilation without sacrificing durability.
<b>Sugarcane EVA</b>	The sugarcane in our sugarcane EVA foam outsoles allows us to reduce dependency on fossil fuels by replacing petroleum-based ethylene, absorbing 1.6 pounds of CO2 for every pound of ethylene replaced.

## Innovations

<b>TREADLITE BY UGG™</b>	Increases cushioning and traction for a supremely lightweight, ultra-durable outsole.
<b>ENERG COMFORT SYSTEM</b>	The next best thing to being barefoot, micropod insole technology offers soft and responsive cushioning.
<b>Imprint BY UGG™</b>	Combines three layers of soft and cushioning foam into an insole that molds to the foot for all-day support.
<b>TWINSOLE™</b>	Offers two cushioned antimicrobial-treated insoles that can be worn interchangeably: one with rich leather lining, the other with luxurious natural wool that wicks moisture and keeps feet warm.
<b>Contour Insole</b>	Wool insole resists compression, displacing weight and contouring to the natural shape of the foot.
