REDEFINING THE RUN

65M
- Heiler m
F19

We're extending an invitation to run to what's possible. No matter the goals people want to achieve or the places they want to go, we're building gear that helps them get after it.

This season, we made game-changing updates to our road-running shoes with the introduction of DNA Tuned, our latest cutting-edge innovation in midsole cushion. Featuring dual-size cell technology that seamlessly blends large cells for softness and small cells for energy return, DNA Tuned was made to redefine the run with a revolutionary approach to make running effortless.

The next generation of Glycerin shoes are all equipped with DNA Tuned so that you can choose the right fit while reaping the benefits of next-level cushion. The new high-stacked Glycerin Max features GlideRoll Rocker geometry and airy, next-generation cushion thanks to the soft yet responsive anatomy of DNA Tuned.

Our trail running shoes were updated to go further and faster. We took feedback from trail running pros to update the fit, materialization, and comfort in the Caldera 8, while the Catamount 4 now features the new and improved SkyVault Trail Plate for uphill efficiency.

This spring, we're confident our new styles and gear updates will deliver what runners need and take them where they want to go — wherever that is, let's run there.

NO TWO RUNNERS ARE ALIKE

Run Signature helps you pick the right shoes. We start by assessing the way your body runs — this determines your need for support — then empower you with your choice of running experience. This combination helps us make a recommendation tailored to you. Your perfect fit. Let's run there.

A SHOE FOR EVERY RUN. A SHOE FOR ALL WHO RUN.

MAX CUSHION

NEW GLYCERIN MAX

\$200 | #00011

Run effortlessly with cutting-edge nitro-infused DNA Tuned cushion.

Stacked tuned cushion

Introducing DNA Tuned, the next generation of nitrogen-infused foam created with dual-size cell technology. Larger cells in the heel provide plush landings, while smaller cells in the forefoot invite responsive toe-offs.

Effortless transitions

Expertly crafted GlideRoll Rocker features dramatically sculpted bevel and toe spring geometries for effortless heel-to-toe transitions.

Stacked to the max

A high stack of new DNA Tuned foam helps protect your body from impact.

Additional Benefits

- Unique Linear Last construction adds more volume to the shoe for a comfortable fit inclusive of foot shapes and orthotics.
- GlideRoll Rocker can help reduce muscular strain at the ankle joint.
- Lower, 6mm offset which can reduce strain on the plantar fascia.

GLYCERIN MAX

Introducing the Glycerin Max, with cutting-edge cushion technology designed to make every step feel effortless. A high stack of all-new, nitrogen-infused DNA Tuned in the midsole works with our GlideRoll Rocker to maximize comfort, responsiveness, and easy heel-to-toe transitions.

Effortless transitions

Expertly crafted GlideRoll Rocker features dramatically sculpted bevel and toe spring geometries for effortless heel-to-toe transitions.

Stacked to the max

A high stack of new DNA Tuned foam helps protect your body from impact.

Tuned cushion

Introducing DNA Tuned, the next generation of nitrogen-infused foam created with dual-size cell technology. Larger cells in the heel provide plush landings, while smaller cells in the forefoot invite responsive toe-offs.

THIS SHOE IS FOR

The Glycerin Max is for anyone who wants maximum soft cushioning to provide ultimate ease and comfort in every step.

WEAR TESTERS SAY

"As I ran longer, I felt the shoe made my run easier. My feet loved the smooth ride, and the cushion is just right."

MAX CUSHION

GHOST MAX 2

\$150 | #0528

Soft, smooth, and protective for maximum comfort.

Protective cushioning

A high stack of nitrogen-infused DNA LOFT v3 midsole foam delivers soft, smooth comfort for a protective feel and easy landings.

Assisted transitions

GlideRoll Rocker actively promotes smooth heel-toe transitions for an effortless feeling as you move.

Stable ride

A broad base offers inherent stability for a secure feel that doesn't interfere with a neutral stride.

What's New

- To achieve CarbonNeutral® product certification for this style, we increase use of recycled materials to lower carbon emissions, then support carbon offset projects to neutralize the emissions we can't yet eliminate.
- Nitrogen-infused DNA LOFT v3 technology offers just-right softness.

Additional Benefits

- Unique Linear Last construction adds more volume to the shoe for a comfortable fit inclusive of foot shapes and orthotics.
- GlideRoll Rocker can help reduce muscular strain at the ankle joint.
- Lower, 6 mm offset which can reduce strain on the plantar fascia.

The Glycerin StealthFit 22 is equipped with DNA Tuned, our new midsole technology that seamlessly blends dual-size cells for a combination of plush landings and responsive toe-offs. The updated flat knit upper offers a blend of stretch and compression that moves with your foot for a comfortable fit.

Smooth, stable transitions

The broad platform stabilizes your foot while the tuned heel and forefoot promotes smooth heel-to-toe transitions..

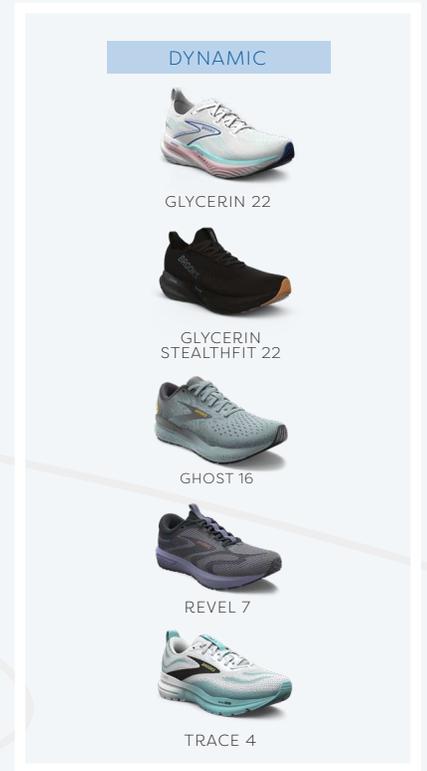

Tuned cushion

New DNA Tuned, the next generation of nitrogen-infused foam, is created with dual-size cell technology. Larger cells in the heel provide plush landings, while smaller cells in the forefoot invite responsive toe-offs.

Adaptable StealthFit

Updated flat knit upper offers a blend of stretch and compression that moves with your foot.

price	\$165
available	02/01/2025

DYNAMIC CUSHION

GHOST 16

\$140 | #0077

Smooth, reliable cushioning for distraction-free runs.

Dynamic cushioning

Nitrogen-infused DNA LOFT v3 midsole foam delivers soft, smooth cushioning that adapts to your unique stride for lightweight comfort mile after mile.

Smooth transitions

The soft midsole and Segmented Crash Pad promotes an easy flow from landing to toe-off.

Enhanced upper

Engineered air mesh upper blends stretch and structure with just-right breathability.

What's New

- New, nitrogen-infused DNA LOFT v3 midsole for lightweight cushioning.
- New RoadTack rubber includes recycled silica and is lightweight and durable.

Additional Benefits

- To achieve CarbonNeutral® product certification for this style, we increase use of recycled materials to lower carbon emissions, then support carbon offset projects to neutralize the emissions we can't yet eliminate.

- Enhanced double jacquard air mesh upper for extra comfort.

WEAR TESTERS SAY

"The first time I ran in the Glycerin GTS 22 my pace was faster and I experienced less fatigue. The combination of cushion and responsiveness resulted in a much easier run, leaving me feeling supported through the impact."

SUPPORTIVE CUSHION

ADDICTION GTS 15

\$140 | #0077

Soft, supportive,
and super protective.

Dynamic cushioning

Our DNA midsole technology delivers soft, adaptive cushioning that reduces impact on your joints as you move, for a protective feel all day long.

GuideRails™ holistic support system

Our innovative technology supports your body in its natural motion path while keeping excess motion in check.

Roomy, comfortable fit

Unique forefoot construction accommodates orthotics and high-volume feet, while an engineered air-mesh upper and 3D FitPrint offer the perfect blend of stretch and structure for supreme comfort.

Additional Benefits

- One-piece outsole keeps the shoe from flexing too much, a benefit for some runners with pedorthic needs.

New Shoe M&W Release 1/1/25

RESPONSIVE CUSHION

NEW LAUNCH 11

\$120 | #0066

Lightweight and versatile for a responsive ride.

Responsive cushion for everyday running

Lightweight DNA Flash foam cushioning is extra responsive with DNA Flash v2 in the forefoot for an energizing ride.

Breathable, secure fit

Mesh upper keeps your foot secure while remaining breathable to help eliminate distractions.

Quick, smooth transitions

The updated RoadTack Rubber outsole provides increased traction for quick forward turnover.

What's New

- Nitrogen-infused DNA Flash midsole paired with DNA Flash v2 forefoot creates a responsive experience.
- Lightweight RoadTack Rubber is made with recycled materials.

Additional Benefits

- Speed Heel pulls the collar away from your Achilles tendon to help avoid chafing and irritation.

Responsive cushion for everyday running

Lightweight DNA FLASH foam cushioning is extra responsive with DNA FLASH v2 in the forefoot for an energizing ride.

Breathable, secure fit

Mesh upper keeps your foot secure while remaining breathable to help eliminate distractions.

THIS SHOE IS FOR

The Launch 11 is ideal for runners who want that lightweight, fast experience that minimizes distractions.

WHAT'S NEW

- Nitrogen-infused DNA FLASH midsole paired with DNA FLASH v2 forefoot creates a responsive experience.
- Lightweight RoadTack Rubber is made with recycled materials.

WEAR TESTERS SAY

"This is the best cushion I've tried! The shoes feel soft, but still like I can run fast in them. They are great for short runs, long runs, and faster workouts. The flexibility lets the shoes move with my feet, and post-run, I don't have any shin pain."

HYPERION MAX 2

Reach high speeds in the Hyperion Max 2. Nitrogen-infused DNA FLASH v2 midsole foam is responsive and protective. Our SpeedVault Plate accelerates transitions for speedy toe-offs so you can push your limits to the max.

RESPONSIVE CUSHION

Assisted transitions

RapidRoll Rocker works with a SpeedVault Plate to actively assist heel-toe transitions for quick turnover.

Fast and protective

A high stack of nitrogen-infused DNA FLASH v2 cushioning is nearly 10% more responsive than before, for protective comfort and speed.

Performance fit

Lightweight mesh offers increased breathability while the upper provides security through hard workouts.

THIS SHOE IS FOR

The Hyperion Max 2 is great for runners looking to train consistently – or to race – in a shoe that has more protective cushioning, with a responsive pop for running at top speeds.

WHAT'S NEW

- Added 4mm to the heel and 6mm to the forefoot.
- SpeedVault Plate enhances cushioning, with a responsive pop for running at top speeds.
- DNA FLASH v2 delivers nearly 10% more energy return and is lighter than the previous version.

WEAR TESTERS SAY

"This is by far my favorite shoe I've ever worn. The cushioning is magical, propelling me forward with the rocker shape and no sore feet. I'll be increasing my mileage each week until tapering for Boston, I'm currently at 50 miles per week and I love running each mile because of these shoes."

LIGHT TRAIL

DIVIDE 5

\$110 | #0506

A familiar feeling that goes confidently from roads to trails.

Transition from road to trail

DNA LOFT v2 cushioning is 10% lighter than before and delivers a soft and smooth ride from roads to trails while aggressive lugs provide offroad grip.

Familiar fit

Road shoe-inspired fit features breathable mesh and a TPU toe-cap for protection on the trails.

Enhanced traction

TrailTack Green rubber outsole is made with 25% recycled content and offers high-performance traction on both wet and dry terrain.

What's New

- To achieve CarbonNeutral® product certification for this style, we increase use of recycled materials to lower carbon emissions, then support carbon offset projects to neutralize the emissions we can't yet eliminate.
- 4 mm added to stack height for a softer ride.

CarbonNeutral.com

Additional Benefits

- Air mesh is lightweight, breathable, and quick-drying.
- Tongue gusset offers snug midfoot fit.
- TPU Mudguard and toecap lightly block debris.
- 3.5 mm lug height.

SPEED TRAIL

CATAMOUNT AGIL

\$180 | #0099

Race technical trails at top speeds.

All-out speed for racing technical terrain

SpeedVault Trail Plate is designed to propel you to top speeds on race day and works with nitrogen-infused DNA FLASH v2 midsole technology to create a lightweight, responsive ride.

Agile & responsive design

Midsole and outsole are precision engineered for speed – lower stack height and responsive underfoot-feel allow you to remain agile at top speeds and tackle dynamic terrain while the articulated SpeedVault Trail Plate helps you maintain footing.

Locked-in fit

Lightweight mesh upper contours to foot for second-skin feel and can be cinched down for increased precision.

Additional Benefits

- To achieve CarbonNeutral® product certification for this style, we increase use of recycled materials to lower carbon emissions, then support carbon offset projects to neutralize the emissions we can't yet eliminate.
- Nitrogen-infused DNA FLASH v2 midsole technology is lighter and provides nearly 10% more energy return than previous version.
- SpeedVault Trail Plate is made of the same Pebax material used in our track spikes to deliver propulsive speed and stability over rugged terrain.
- TrailTack Green outsole provides superior traction on wet and dry surfaces.
- Perforated outsole shaves weight while delivering high-performance traction, grip, and protection on the trails.
- 4.5 mm lugs.

MAX CUSHION

NEW

GHOST MAX L

\$160 | #0088

Plush stacked cushion meets durable leather upper.

Leather upper

The leather upper offers durability and is easy to clean.

Protective cushioning

A high stack of nitrogen-infused DNA LOFT v3 midsole foam delivers soft, smooth comfort for a protective feel and easy landings.

Easy, assisted transitions

GlideRoll Rocker actively promotes smooth heel-to-toe transitions for an effortless feeling as you move.

What's New

- Nitrogen-infused DNA LOFT v3 offers lightweight softness.
- Durable leather upper

Additional Benefits

- GlideRoll Rocker
- Linear Last construction adds volume that creates a more inclusive fit. Great for orthotics.

NEW GLYCERIN 22

\$165 | #5709

Tuned cushion

New DNA Tuned, the next generation of nitrogen-infused foam, is created with dual-size cell technology. Larger cells in the heel provide plush landings, while smaller cells in the forefoot invite responsive toe-offs.

Accommodating fit

New engineered double jacquard knit upper provides a flexible, accommodating fit.

Smooth, stable transitions

The broad platform stabilizes your foot while the tuned heel and forefoot promotes smooth heel-to-toe transitions.

TECH TALK

Specialized, high-tech features that set our shoes apart.

midsole

DYNAMIC CUSHIONING

DNA

A responsive midsole technology that cushions each step and adapts to a runner's unique stride, weight, and speed.

DNA FLASH

A nitrogen-infused midsole cushioning compound that provides ultralight softness with plenty of energy return to power your run.

DNA FLASH v2

We reengineered the chemistry of our fastest midsole technology to make it less dense and more — well, more everything. Softer and lighter, with nearly 10% more energy return than the original, nitrogen-infused DNA FLASH v2 foam is designed for high-speed running.

DNA LOFT

A finely calibrated mix of Brooks DNA foam, air, and rubber, DNA LOFT is our soft cushioning engineered for plush comfort without lost responsiveness or durability.

DNA LOFT v2

Lighter than the original but just as soft, DNA LOFT v2 has a unique balance of rubber, air, and a less dense, lighter foam, for a plush feel that won't bottom out or weigh you down.

DNA LOFT v3

We fine-tuned the nitrogen infusion process to amplify our soft cushion compound. DNA LOFT v3 boasts optimized softness, enhanced responsiveness, and lighter weight, all without sacrificing durability.

DNA Tuned

The next nitro-generation of foam is here. DNA Tuned is infused with nitrogen and features dual-size cell technology — larger cells for softness and smaller cells for responsiveness.

FLEXIBILITY & ALIGNMENT

Flex Grooves

Strategic etching underfoot that enhances flexibility, for an effortless forefoot ride without compromising the integrity of the cushioning.

Propulsion Plate

Engineered to push runners forward with every stride, the plate works with ultralight cushioning for optimal race-day efficiency.

SkyVault Trail Plate

A Pebax plate engineered to aid in uphill running. When a runner steps on the plate and pushes off in stride, the plate bends and snaps back into place, delivering propulsion and assistance as the runner climbs. And the unique shape provides flexibility on technical terrain, as well as stability and comfort on downhills.

SpeedVault Plate

Built for daily use, this balanced speed plate features optimized stiffness for training. It's designed to propel the runner forward and provide energy return.

SpeedVault Race Plate

Developed for racing, this plate maximizes energy return and spring for forward propulsion. Featuring premium materials and optimized bending stiffness, plus strategic design that tailors performance to the race distance and surface.

SpeedVault Race+ Plate

Made for speed, in partnership with Arris, this plate delivers a consistent experience for runners with different shoe sizes and builds — the right bending stiffness, with no added weight. And no added waste, thanks to near-zero-waste manufacturing methods.

SpeedVault Trail Plate

Designed for efficient, fast running on technical trails, this Pebax plate's forefront sits close to the ground for optimal forward motion. Its length extends beyond the forefoot to improve performance, and it connects to the big toe for propulsion. Plus, the plate lets the foot articulate, so the shoe goes wherever the runner wants.

Segmented Crash Pad

A system of fully integrated shock absorbers that accommodates any foot landing to maximize efficiency, provide cushioning, and create smooth heel-to-toe transitions.

RapidRoll Rocker

The curved sculpting of the heel and toe of the midsole is constructed to actively propel you forward with effortless speed.

GlideRoll Rocker

The GlideRoll Rocker facilitates a smooth transition forward in each step. It delivers more comfort — keeping some people in their habitual motion path — to help the body do less.

Trail Adapt System

Strategic configuration of zonal pods on the outsole, designed for traction and stability on uneven terrain.

midsole *(continued)*

SUPPORT

Extended Progressive Diagonal Rollbar

An extended version of our Progressive Diagonal Rollbar, which is a tri-density post at the medial arch that is biomechanically engineered to allow for progressive support and create smoother transitions from the midstance phase to the propulsion phase.

GuideRails® holistic support system

An innovative, on-demand support technology that guides the body – hips, knees, and joints – into its natural motion path of least resistance.

outsole

Ballistic Rock Shield

A toughened, thermoplastic EVA sheath between the outsole and midsole that protects the forefoot by spreading out point loads from sharp objects.

Blown Rubber

A low-weight rubber compound. We dialed down the density to crank up the responsiveness.

HPR

High-performance rubber, or HPR, is an outsole compound that's abrasion resistant and durable for longer wear.

RoadTack Rubber

Our do-it-all rubber compound designed for durability, light weight, and rebound. Made with recycled materials.

Slip-Resistant Outsole (SATRA TM144:2011)

Slip resistance on both wet and dry surfaces.

TrailTack Rubber

A sticky rubber compound that provides outstanding uphill and downhill traction, even on wet surfaces.

TrailTack Green

The next generation of TrailTack Rubber, TrailTack Green, includes recycled content and requires less material to build than the original. So it's easier on the environment while still delivering excellent wet-dry traction on the run.

upper

Engineered Mesh

Custom-designed and strategically woven or knit mesh that provides optimal structure and breathability.

Flat Knit

Our premium knit construction specifically designed to move and expand seamlessly with your foot for a sock-like fit and optimal performance.

GORE-TEX® Invisible Fit

An updated lightweight membrane is bonded directly to the upper for a lighter, more flexible fit, offering breathable, waterproof protection on the run.

OrthoLite® Sockliner

Contoured insert designed to fill any negative space under the foot.

3D Fit Print

An advanced screen-printing process to apply strategic stretch and structure for a seamless, impeccable fit.

Stretch Woven

A pliable upper construction that wraps the foot in a sock-like fit.

Ultimate Sockliner

A PU insert with an OrthoLite® memory foam middle layer and convoluted egg-crate surface that provides substantial cushioning, breathability, and conformability.

TPEE

A durable, abrasion-resistant, hydrophobic fiber used primarily in our Trail upper textiles to help protect the foot from debris.

Have you tried using FastTrack on your mobile or tablet devices?

Using FastTrack on the “go” is easy. In addition to our mobile app – available in your device’s app store – the full web view also scales to screen on your desktop, laptop, tablet, and mobile devices.

With FastTrack you can:

- View available inventory
- Place at once and future orders
- View order status and track shipments
- See who placed orders and access open baskets
- Email suggested baskets
- View and order from Brooks spotlight lists
- Scan barcodes to access product
- Sales reps can review and approve future orders

*For optimal performance, use Chrome as your web browser

FastTrack
BROOKS

LOCALLY

Did you know runners are 4x more likely to do their research on [brooksrunning.com](https://www.brooksrunning.com) and buy in a physical store than they are to finish their purchase online?

Locally.com allows Brooks to tell online shoppers when you have our products available in store. We have found that retailers who share their inventory with Locally.com benefit from the web traffic on [brooksrunning.com](https://www.brooksrunning.com).

Signing up for Locally can:

Introduce runners to your store

Locally provides additional exposure to runners new to town or who haven't been into your store yet. Enjoy a customizable notification schedule that lets you receive text and / or email alerts during business hours. You also have the option to direct message with the shopper at any time during the ordering process. Retailers who share inventory with Brooks through our dealer locator on Locally get five times more views than those that don't.

Drive traffic and sales

On Locally, customers can choose between these options: Reserve Online / Pickup In Store, Buy Online / Pickup In Store / Same Day Delivery. Sales from these transactions on Locally have increased 4–6X throughout 2020 as customer shopping behavior has evolved. This expanded toolkit gives runners more opportunities than ever to shop your store. You can also accept orders for in-store pickup directly from [brooksrunning.com](https://www.brooksrunning.com), Facebook, your own site, and Locally.com.

Help us highlight your store

When our website inventory runs low, we direct runners to Locally to search retail inventory in their hometowns — at stores like yours! And Brooks can layer Locally's store locator tool into marketing campaigns to drive attendance to store events.

New

Locally now offers Same Day Delivery. To provide support for new shopping behaviors, Locally now enables all participating retailers Same Day Delivery with no additional cost. Same Day Delivery is a great addition to in-store or curbside pickup. Available in Postmates market (US only for now), standard 3.5% transaction fee plus carrier delivery charges still apply.

Have any questions or just want to get started? Contact your Brooks rep, or head straight to www.locally.com/go/launch.
